## Preparing For Your Move

In terms of preparing for your move, there are several things you can do to prepare before your removal specialists arrive. This helps to ensure the removal process is as smooth and efficient as possible.

### 1. Prepare

If we are working on an hourly rate, the better prepared you are and the more you can do yourself, the cheaper your move will be. It is essential to ensure there is a clear path for the removal specialists to work safely.

### 2. Packing

Please ensure any small items that you would like the removal specialists to take are packed in boxes, with fragile boxes clearly labelled and heavy items e.g. books, packed in sturdy boxes. Also remember that boxes of uniform size make it far easier for our removal specialists to pack the truck and ensure a quick removal process. Remember we supply sufficient FREE boxes with every house move.

### 3. Empty

Please ensure drawers, cupboards, bookshelves which you would like us to move are emptied to save time.

### 4. Disassemble

Disassembling and re-assembling furniture is one of the most time-consuming jobs for your move and generally speaking it is relatively easy to do. Beds and some desks if already disassembled will save you both time and money off your removal bill, although we are more than happy to do both disassembly and reassembly if required.

### 5. Disconnect

Disconnecting washing machines, TV's, computers and surround sound speakers, all assist in making it easier for our removal specialists to get to the larger, heavier furniture.

Please bear in mind that although Mr Shifter removals in Bradford removal specialists can do all the above tasks, if you are working on a budget, these are just some of the areas that can save you time and money when moving house.
